

# EDM Polishing Stones (Aluminum Oxide)

## AM-8

The AM-8 is designed for removing EDM scale on all types of mold and die steel. Additionally, it is an excellent tool for polishing sharp corners and small details either by hand or with the use of polishing machines.

## Die Stone

The Die Stone is engineered for use on all tool steels. It provides consistent breakdown and fast cutting action. It is slightly harder than the AM-2.

# General Purpose Stones (Aluminum Oxide)

## AM-K

The AM-K is a white aluminum oxide stone of medium hardness that performs well on all types of mold steel. Generally, it is used dry for rough forming and removal of machine marks. Lubricants are not recommended.

AM-K		100	150	180	220	320	400	600
